REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest the claimed invention as a whole including a heating means including a resistor having two segments made of different metal alloys, joined on one of their ends to form a thermocouple, the joint of said segments being placed in the center of an intake duct, in the context of a system for controlling intake air temperature in an internal combustion diesel engine suitable for heating intake air, controlling the temperature and knowing the flow rate of the airflow, the system comprising a module including heating means and a control circuit, said module being placed at each intake inlet in order to heat and control the temperature of the intake air up to a limit at which the temperature is maintained constant and independent of ambient temperature. Note that thermocouples are conventionally utilized to function as temperature sensors in heater control circuits rather than to function as the heating means itself.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marguerite J. McMahon whose telephone number is 571-272-4848. The examiner can normally be reached on Monday-Wednesday and Friday, 10am-6:30pm.
